

*Ted Allingham Scholarship Trust Fund*

*The Directors of the BC Water Supply Association have established a Scholarship Trust Fund in recognition of Ted Allingham, a local resident who passed away recently.*

*Ted was an important and influential person in the Water Industry, and the Directors felt his considerable contribution should be recognized. The Association and its members have benefited greatly from his accomplishments over many years, and a Scholarship Trust Fund is one way of showing that his achievements have not gone unnoticed. Ted worked in the water supply field for most of his working life, and was employed as the Waterworks Foreman for the District of Lake Country for the past six years.*

*The Scholarship will be awarded annually to a mature student who has completed the first year of the Water Quality Technology Program at Okanagan College. The intent is to honour and assist a student who has shown the determination, strength of character, and leadership qualities that were exemplified by Ted Allingham. The first award of the scholarship was made on April 7, 2006 with Allison Neil being the recipient.*
